Swiss Re Corporate Solutions offers a variety of surety products for mid-sized companies to large multinational firms requiring guarantees. Combining deep product expertise, a global network and exceptional local service, we provide clients and brokers with solutions for a wide range of surety needs.

Surety products provide a number of benefits for companies in a range of industries, including construction, engineering, oil & gas, manufacturing, shipbuilding, pharmaceuticals, transportation and retail. These benefits include diversification of financial partners, while maintaining borrowing capacity and credit lines with existing bank relationships. This gives greater financial flexibility in managing working capital, financial investments and opportunities for acquisitions.

In addition, in some markets, pure surety instruments with conditional bond wordings are a legal requirement, such as when working on public projects. We can issue and service these bonds that other guarantee providers cannot, because we are licensed and do not offer high-cost risk instruments, such as Letters of Credit. Our bonds and guarantees provide the same security as those issued by banks.

The Swiss Re Corporate Solutions Difference
