Alternative Risk Transfer Solutions

Cross-class Stop Loss Programme for Captives

Swiss Re Corporate Solutions provides tailor-made solutions to large corporations and captives for their (re)insurance, fronting and alternative risk transfer needs.

Our Cross-class Stop Loss Solution

Swiss Re Corporate Solutions provides multi-year and multi-class captive retention protection to both reduce the cash flow volatility for multiple annual periods and to support and grow the capitalisation of the captive over time. The captive protection kicks in after the defined annual aggregate deductible has been eroded.

We work closely with you to customise deductibles, and define captive retention levels and types of risks to be ceded in order to ensure that optimal coverage is purchased based on your loss expectations and needs rather than on market availability.

The terms and conditions of the captive protection programme are determined at the start of the term and locked-in for the period, offering you a guaranteed term capacity at a predictable budget. Our solution is straightforward to implement, globally proven and has a successful track record.
